## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 28 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "having a generally uniform outer diameter" is vague and indefinite. One of ordinary skill in the art would not be able to determine the metes and bounds of the invention.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

Art Unit: 3711

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 28-32 and 34-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brine (6752730) in view of Matinlassi (4233834). Brine discloses it is old in the art to use a metal shaft for a lacrosse stick (fig 1). Matinlassi discloses an eccentric diameter (fig 6). . It would have been obvious to one of ordinary skill in the art at the time of the invention to have employed any one of several equivalent extrusion cross-sections based on cost and design considerations.

As to claims 29 and, 33: Brine discloses a metal material (3:58-62).

As to claims 30-31: Matinlassi discloses a substantially constant wall thickness (fig 6b).

As to claim 32: Brine discloses an extruded handle (fig 1).

As to claims 34-35 : See claim 28 rejection.

Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brine as applied above and further in view of Official Notice . Official Notice is taken that the use of aluminum and titanium is well known in the art. It would have been obvious to one of ordinary skill in the art at the time of the invention to any one of several equivalent materials based on cost and design considerations.

Also,

Claims 28-32 and 34-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brine (6752730) in view of Merola (3697069). Brine discloses it is old in the art to use a metal shaft for a lacrosse stick (fig 1). Merola discloses an eccentric diameter (fig 5-7). . It would have been obvious to one of ordinary skill in the art at the

Art Unit: 3711

time of the invention to have employed the cross sectional area of Merola with the shaft of Brine in order to provide a stronger shaft for checking during play.

As to claims 29 and, 33: Brine discloses a metal material (3:58-62).

As to claims 30-31: Merola discloses a substantially constant wall thickness (fig 5).

As to claim 32: Brine discloses an extruded handle (fig 1).

As to claims 34-35 : See claim 28 rejection.

Claim 33 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brine as applied above and further in view of Official Notice . Official Notice is taken that the use of aluminum and titanium is well known in the art. It would have been obvious to one of ordinary skill in the art at the time of the invention to any one of several equivalent materials based on cost and design considerations.

### ***Response to Arguments***

Applicant's arguments with respect to claims 28-35 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3711

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
